

Distance

```
graph TD; Distance[Distance] <--> WiFiDirect[WiFi-Direct]; Distance <--> Social[Social]; Distance <--> Contextual[Contextual]; WiFiDirect <--> Data[Data]; Social <--> Data[Data]; Contextual <--> Data[Data];
```

The diagram illustrates a conceptual model with two main horizontal layers. The top layer is a white rectangular box labeled 'Distance'. The bottom layer is a gray rectangular box labeled 'Data'. Between these two layers are three gray rectangular boxes: 'WiFi-Direct' on the left, 'Social' in the center, and 'Contextual' on the right. Each of these three middle boxes is connected to both the 'Distance' box above and the 'Data' box below by a vertical double-headed arrow, indicating a bidirectional relationship between all four components.
